FIG. 28 is a schematic diagram of a system 1600 for projecting light onto a surface 1620. The system 1600 includes a light source 1632, a lens 1640, a filter 1642, a mirror 1650, a reflector 1660, and a series of light guides 1622, 1624, 1626, 1628. The light source 1632 emits light 1630, which is focused by the lens 1640 and passes through the filter 1642. The light then reflects off the mirror 1650 and is directed towards the reflector 1660. The reflector 1660 directs the light into the light guides, which project the light onto the surface 1620. The surface 1620 is divided into four regions: 1620a, 1622a, 1624a, and 1626a. The light guides 1622, 1624, 1626, and 1628 are arranged in a row, and the light is projected onto the surface 1620 from each of these guides. The surface 1620 is also labeled with 1620a, 1622a, 1624a, and 1626a. The system 1600 is shown in a perspective view, with a horizontal axis L and a vertical axis R.
